RE: House Bill #826

Because I feel that my horrifying five-year nightmare with C.Y.S. is not paramount to the overall legislative issues, I will skip the details of their [terror-driven lust] to destroy my family—except to say that my four **unfounded** allegations speak for themselves.

Over the years I have always wondered how one or a few persons can take total control of the government and start terrorizing the people. Well, now I know. By being involved myself and observing the never-ending cases of terror being inflicted upon citizens by C.Y.S. goon squads, it is crystal clear how a great nation can surrender its will to a terrorist group.

In countries like Germany under Hitler and Russia under Stalin, I always wondered: Where are the elite? Where are the leaders? Where are the noble citizens such as judges, lawyers, doctors? What must these people be doing? What must they be thinking when the goons first start imposing their [social experiment] on the masses. Well, now I know.

I once read that: "*Power tends to corrupt and absolute power corrupts absolutely.*" There is no other government agency more deserving of this title than C.Y.S.

C.Y.S. is the most dangerous organization in the United States. Any agency which is mandated (absolute powers) by the legislature will become corrupted and dangerous. This is C.Y.S.'s posture today.

Any agency which has an open mandate by the legislature to usurp every single amendment of the [U.S. Constitution] is an unbelievable disgrace to America. Reading the Pennsylvania [codes and regulations on child protection] will make one become a flag burner.

Any agency which is allowed to carry an [automatic conviction form] in briefcase is a danger to society—guilt by innuendos!

A society which allows unscreened, untested, plausible inverters or socio-paths to snatch a newborn baby from mother and never return same is a very, very dangerously sick society. Where are the noble citizens?

We never learn! History should teach us that every "**great social experiment**" is predicated on the theory of **removing** children from parents, contrive mind-altering schemes for children to side with the goon squads. Nazism did it ... Russian Communism did it ... Romanian Communism did it ... East German Communism did it ... and Chinese Communism did it! Oh, where ... Oh, where are the noble citizens?

Even though [House Bill #826] would only be a tip of the iceberg in alleviating all the woes wretched upon families by the present system, I urge every lawmaker to support the bill. Because the entire child protective system is so out of line with the American Democratic system, it should be scrapped. Under the existing [absolute power mandate] it is absolutely hopeless to ever work in harmony with American families. A baby is the highest order of sacrosanct from "God," and is not intended to be used by government agents as pawns against the mother and father.

It should become the lawmaker's top priority to establish a [citizens committee] to feed information and recommendations for drafting a whole new merciful agency. The present one is dripping with blood!

Please God, help us!
