We would like to express our support for House Bill 2374 since it finally addresses the obstacles to treatment for the people with mental illness.

It is long overdue for these poor souls such as my daughter who has had schizophrenia for over 20 years and a long history of trials and tribulations.

**We support House bill 2374 and urge the Judiciary Committee to bring it before the House for an affirmative vote.**

Thank you,

Mary and George Mallas
