P R O C E E D I N G S

- - -

CHAIRMAN LEVDANSKY: Good afternoon.

This is a public information meeting of the House Finance Committee. Earlier this session there was a change in the jurisdictions of some of the standing committees in the House and the issues that they're charged with -- with addressing.

It used to be that all the pension-related pieces of legislation would either be assigned to the House Local Government Committee, the House State Government Committee, or the House Education Committee.

But when the -- the Gaming Committee was -- was created, the decision was to move all legislation pertaining to gaming, and small games of chance and things like that, to move those issues out of the House Finance Committee and into the -- the newly created Gaming Committee and instead to move some of the legislation dealing with pension issues under -- into the jurisdiction of the House Finance Committee.

1 So this week is an opportunity for
2 the members of the committee, myself included,
3 to gain a better familiarity of our -- of our
4 pension systems in the state, from those at
5 the municipal government level to the school
6 district level and to the state level as
7 well.

8 And so today we're -- we're -- we've
9 invited experts in the field of municipal
10 pension systems to testify before the
11 committee and -- and provide us with some
12 overview and some understanding of municipal
13 pension systems.

14 Tomorrow the Finance Committee will
15 have a hearing that we'll have witnesses and
16 experts from the State Employee Retirement
17 System and the Public School Employee
18 Retirement Systems to testify before the
19 committee as well.

20 And then on Wednesday, as a follow-up
21 to the last committee meeting, when members
22 had raised questions and concerns relative to
23 the state bond indebtedness, we're going to
24 have testify before the Committee Budget
25 Secretary Michael Masch to address that issue

1 of the state's bonding indebtedness.

2 So with that, before we -- before we
3 get started, let me recognize my -- my
4 colleague, Representative Steve Nickol.

5 REPRESENTATIVE NICKOL: Thank you,
6 Mr. Chairman.

7 I -- I think it would be a good move
8 and for my own -- from my own perspective to
9 try to get pension issues under the
10 jurisdiction of one committee. Mainly because
11 so many of these issues are so complex and
12 dividing it up with staff for three separate
13 committees ends up with the staff really not
14 being all that familiar or gaining that much
15 expertise on pension issues.

16 And I think it would be good from the
17 perspective of having one committee who are --
18 with staff and members who are up-to-date, so
19 to speak, on these issues.

20 And so in that respect, if this
21 committee is going to be handling more -- a
22 larger share of pension issues, I think it's
23 great that the Chairman has scheduled this
24 primary, I guess you could call it, on pension
25 issues by having all the major players,

1 starting with the Public Employee Retirement
2 Commission, who is an arm of this General
3 Assembly in terms of providing advice on
4 pension issues.

5 I applaud him for these hearings.

6 CHAIRMAN LEVDANSKY: Thank you. And
7 just one other -- one other thing. I just
8 want to follow up to what Representative
9 Nickol just said.

10 Just let me take this opportunity to,
11 Steve, once again, public -- publicly
12 acknowledge your contribution to the
13 legislature, having, I think, a considerable
14 understanding of pension issues.

15 Steve has a considerable
16 understanding, Representative Nickol has a
17 very considerable understanding of
18 pension-related systems relative to the
19 state.

20 My only disappointment is that he
21 won't be -- that he won't be seeking
22 re-election to continue to provide his
23 expertise in this area. So -- regretfully.

24 And so what I'm going to do between
25 now and the end of the year, Steve, I'm going

1 to use your expertise as much as I can.

2 Okay?

3 With that, let me have the members of
4 the committee introduce themselves starting on
5 the far right.

6 REPRESENTATIVE VULAKOVICH: State
7 Representative Randy Vulakovich, Allegheny
8 County.

9 REPRESENTATIVE PEIFER: Mike Peifer,
10 the 139th District, which is Pike, Wayne, and
11 Monroe.

12 REPRESENTATIVE DENLINGER: Gordon
13 Denlinger, eastern Lancaster County.

14 REPRESENTATIVE HARRIS: Adam Harris,
15 Juniata, Mifflin, Snyder.

16 REPRESENTATIVE BOYD: Scott Boyd,
17 part of Lancaster County.

18 REPRESENTATIVE NICKOL: Steve Nickol,
19 Adams and York Counties.

20 REPRESENTATIVE SAINATO: Chris
21 Sainato. I represent Lawrence and a small
22 section of Beaver County.

23 REPRESENTATIVE FABRIZIO: Flo
24 Fabrizio, Erie County.

25 REPRESENTATIVE SEIP: Representative

1 Tim Seip. I have the Cabela's and the
2 game land district.

3 REPRESENTATIVE KESSLER: Hard act to
4 follow there.

5 Dave Kessler, southern Berks.

6 CHAIRMAN LEVDANSKY: Thank you. With
7 that we'll introduce Mr. James McAneny, the
8 Executive Director of the Public Employees
9 Retirement Commission.

10 DIRECTOR McANENY: Well, thank you,
11 Mr. Chairman. I realize you had promised
12 everyone they'd have experts on pensions to
13 speak today, but you're stuck with me
14 instead.

15 This is a really interesting area of
16 the law and of the -- of legislation to those
17 of us who don't bore too easily.

18 You're going to find that there is --
19 are roughly 15 state statutes governing the
20 operation of local government pensions in
21 Pennsylvania. That does not include the Tax
22 Codes, the Internal Revenue Code, the
23 Pennsylvania Inheritance Codes, or the
24 Probate, Estates, and Fiduciaries Codes
25 dealing with fiduciary responsibilities. This

1 is just pure pension stuff.

2 The state systems are much simpler
3 because there's one statute for each of the
4 two state systems, main state systems.

5 You're going to hear from Jim Allen
6 later this afternoon from the Pennsylvania
7 Municipal Retirement System, which is part
8 state system and part administrator for local
9 government systems, which can go right back to
10 that, who knows what it's going to be.

11 The role of the Public Employee
12 Retirement Commission really is twofold. One
13 is regulatory. We have an administrative
14 function, a regulatory function within what's
15 called Act 205 of 1984. That's the General
16 Municipal Pension Systems Recovery and State
17 Aid Program.

18 The regulatory function deals with
19 ensuring that each pension plan files
20 actuarial reports on a biennial basis and that
21 they then fund their pension plans in
22 accordance with that actuarial requirement,
23 with the statutory requirements of Act 205.

24 The commission also reviews those
25 actuarial reports for purposes of determining

1 each municipality's eligibility to receive
2 state pension aid and the proportion in which
3 they'll be entitled to share.

4 Last year, that was \$206 million that
5 was distributed. So this is not a small
6 amount of money. This is \$206 million of
7 state tax revenues that never actually passed
8 through the General Assembly and the budget.

9 So that you have an idea of where
10 that comes from, in the Tax Reform Code,
11 which is -- okay -- Section 902. It imposes a
12 tax on insurance companies doing business in
13 Pennsylvania to pay a two percent tax on those
14 premiums.

15 Now, if the municipal -- if the
16 insurance company is headquartered outside of
17 Pennsylvania, if it's what we call a foreign
18 corporation, domiciled in some other state,
19 that two percent tax does not go into the
20 general fund.

21 It goes into a special fund, which is
22 then used to support the volunteer fire relief
23 associations and municipal pension plans. And
24 it's been that way for quite a number of
25 years.

1 The first act -- first statute that
2 dealt with that was passed in the 1920's and
3 it's more or less tracked consistently ever
4 since.

5 The \$206 million is utilized by those
6 municipalities that receive it to allay their
7 costs of providing municipal pensions and also
8 to fund the administrative expenses that they
9 incur in providing those municipal pensions.

10 We don't actually distribute the
11 money. That's handled by the Auditor
12 General's Office.

13 And if you watch, they'll do the --
14 they have the news releases every autumn,
15 around October, saying we just sent this big
16 check to your municipality.

17 The -- the state aid system which was
18 adopted in 1984, effective in 1985, Act 205,
19 was a major change from the old allocation
20 system.

21 Before that aid was only available to
22 police and fire pension, not to nonuniform or
23 general employee pension plans.

24 And the allocation of state aid was
25 based upon population, miles of paved road,

1 and other totally irrelevant conditions which
2 resulted in some municipalities receiving
3 substantial amounts of money in excess of what
4 they required and other municipalities to be
5 severely shortchanged.

6 We're still dealing with that
7 situation. We have a number of municipalities
8 in Pennsylvania which were so overfunded under
9 the old statutory scheme that they live now
10 off the interest earned on those pension
11 monies that they received from the state
12 before 1985.

13 The interest alone is exceeding their
14 full cost of providing pension benefits and
15 administrative expenses, and it just continues
16 to increase, and there's no indication that
17 that will change in the near future.

18 We have other plans. Almost half of
19 our plans receive their entire cost
20 requirement from the state. In other words,
21 there's no employee earned contribution at
22 all.

23 I think last year it was 47 percent.
24 It -- it hovers right in around the halfway
25 point.

1 We have other plans that are
2 substantially underfunded and have great
3 employer contributions in addition to what
4 they receive from the state.

5 The purpose of Act 205 was to
6 gradually shift that. The idea was to get
7 everybody to a zero balance. Those who were
8 being overfunded would get less, those who
9 were being underfunded would get more, and
10 gradually it would all come out to a zero.

11 We're nowhere near that zero yet. In
12 fact, the most recent study that was done by
13 the Economy League of Southwestern
14 Pennsylvania would indicate that about the
15 same number of plans are underfunded as were
16 in that same situation back in 1985.

17 So the -- while some of the
18 individual players have shifted their status,
19 the overall scheme has not.

20 Philadelphia, by the way, is not a
21 part of the structure for the state aid.
22 Philadelphia is limited to 25 percent of the
23 total amount that can be paid out in state
24 aid.

25 That sounds like a lot of money, but

1 if they were getting their unit value instead,
2 they'd be more like 50 percent. So, yes, they
3 have that many employees.

4 So if they actually got what -- if
5 they were paid on the same ratio, the same
6 basis, as every other municipality were,
7 they'd receive about twice as much money as
8 they do now, and everybody else would
9 obviously then get a lot less. So -- but
10 Philadelphia is in the mix, but they're in the
11 mix on a fixed percentage basis.

12 That is -- that is a nutshell of the
13 commission's work in regard to Act 205.
14 Obviously, there's a lot more that could be
15 addressed, but I'm trying to see if we can't
16 just overview a few major points.

17 You should each have received a
18 document with sort of a yellowish cover,
19 fairly thin, Public Employee Retirement
20 Commission, state seal in the middle, and it
21 references that it was prepared for this House
22 Finance Committee meeting. That provides some
23 overview of what we do.

24 In addition, you will have received
25 or you should have received a copy of our

1 status report on local government pension
2 plans dated from November of 2006 and a
3 current version of our legislative update,
4 legislative report, which shows the pending
5 pension legislation, pending retirement
6 legislation, and that which has been
7 introduced in this particular session of the
8 General Assembly.

9 Again, to walk back into who we are
10 and where we came from, this commission was
11 created by Act 66 of 1981.

12 We're made up of four legislative
13 members, one from each caucus, and we also
14 have five gubernatorial appointees. The
15 gubernatorial appointees are required by
16 statute to have skills and experience in the
17 area of public pension.

18 Besides monitoring those pension
19 plans that we do through Act 205, one of the
20 other things we do and one of the things we
21 were created to do back in 1981 is to provide
22 an actuarial analysis of every piece of
23 legislation affecting pensions before it
24 receives second consideration in the house of
25 origin.

1 That's our legislative function.

2 That's one of the reasons why we're an
3 independent commission as opposed to being
4 purely an executive branch commission, because
5 we have this dual function.

6 One is entirely under the executive,
7 the regulation under Act 205, and this one,
8 which is purely legislative, which is to
9 provide guidance to the General Assembly on
10 pension legislation.

11 The -- the first handout that I
12 referenced, the small one, beginning on Page
13 10, we've outlined the legislative procedures
14 that need to be followed in order for us to
15 perform our function dealing with the General
16 Assembly.

17 The statute has provided the
18 commission with 20 legislative days from the
19 date of first consideration or adoption of a
20 floor amendment in order to prepare the
21 actuarial report.

22 If we don't have it done in that much
23 time, you're free to proceed with the second
24 consideration.

25 But prior to that, you may not

1 proceed with your second consideration until
2 after our actuarial study is done.

3 The more complex the issue, the
4 longer it takes us to get that work done. I
5 mean that sounds simple, but we move as fast
6 as we can.

7 There's no question that we have
8 historically come in well under the
9 20-legislative-day mark, and we do everything
10 we possibly can to be as accommodating to the
11 needs of the legislature as possible.

12 However, if you send us a very
13 complicated piece of legislation, it can
14 take -- we are not going to have it back to
15 you the next day, no matter how hard we try.
16 No matter how badly you want it. It can't be
17 done.

18 Plus, it has to go before our
19 commission in a public meeting held here in
20 Harrisburg, which means we have to gather up
21 our commissioners and get them into town.

22 And, normally, that's not a big
23 problem. But the more lead time you can give
24 us, especially on important issues, the better
25 off we are.

1 The normal process is that we respond
2 to requests for actuarial notes that come from
3 leadership. That can be leadership of the
4 general -- of the chamber. That can be a
5 committee chair, whether it be majority or
6 minority committee chair.

7 We're as accommodating as we can be.
8 We have not -- and this is by agreement with
9 the General Assembly. We do not act on a
10 request that just comes from a member that has
11 not been vetted and sent to us by leadership.

12 And that's a policy that was
13 established in the past at the request of the
14 leadership of the General Assembly because,
15 for obvious reasons, they wanted to maintain
16 some control over this.

17 Plus, there's a budgetary
18 consideration in that. Our agency is
19 not highly -- is not a heavily funded one.

20 Our total appropriation is about
21 three quarters of a million dollars, and that
22 covers everything, including the actuaries.
23 So it gets a little bit tight sometimes.

24 We can't do an actuarial report on
25 every piece of legislation that gets

1 proposed.

2 We respond as rapidly as we possibly
3 can. The actuarial notes that are prepared,
4 as I said, are presented at a public meeting.
5 The sponsor is always invited to attend and to
6 participate. And we welcome those -- the
7 participation of sponsors of legislation.

8 And we then proceed with issuance of
9 an actuarial note and transmit the same to the
10 General Assembly and to the Governor.

11 There's also a process that's been
12 utilized which is a bit short of an actuarial
13 note, and that's what we call an advisory
14 note. And that's one that's normally done
15 before any real consideration. It's usually
16 while the bill is still in committee.

17 And it's a guidance type of a note.
18 It is not run through the entire commission.
19 It's not vetted in and -- and approved at a
20 public meeting.

21 It is sent over, and it's just what
22 it says, it's advisory only.

23 And the only other reports that we do
24 are policy reports, and probably the most
25 recent one that we've done, that some of you

1 may be familiar with, because you're still
2 trying to figure out what to do with that
3 giant piece of paper that you have filling up
4 your office, was a report on divestment
5 legislation.

6 It was sent out to everybody last
7 fall. That was triggered by the request of
8 the commission chair. Even though investments
9 are not really within the scope of the
10 commission's general purview, because it
11 doesn't have anything to do with actuarial
12 status, the impact on funding generally was
13 one that the chairman wanted to address.

14 And we did put together a policy
15 report, a special report on divestment
16 legislation, that was issued. It was adopted
17 the end of October, and some of you may be
18 familiar with it.

19 I'm sure no one has read it. And I
20 don't blame you. But that is another type of
21 report that we do.

22 The -- the legislative function,
23 again, goes to every single piece of
24 legislation which deals with pensions in any
25 way.

1 There is another twist, by the way.
2 If you'll take a look at the legislative
3 report that was handed out, I want you to note
4 something here.

5 The very first bill on the first
6 page, which was House Bill 126, was a PSERS
7 and SERS amendment to expand the employer
8 contribution floor rates, mandatory
9 contribution rates.

10 And you'll see that there was --there
11 were two actuarial notes done by the
12 commission. Both of them issued on March 22nd
13 of 2007.

14 One was the actuary -- was for
15 Printer's Number 152 and one was for an
16 amendment. That's the A number that you see.
17 Amendment 174.

18 The reason I want to point that out
19 to you is because we had one piece of
20 legislation actually pass last year; and if
21 you'll look on Page 7 of that same report, at
22 the top of that page, you will see a reference
23 to House Bill 876.

24 876 was the increase of the SERS
25 floor to four percent. That was adopted and

1 signed by the Governor as Act 8 of 2007.

2 But what you don't see in that
3 right-hand column -- and we have them
4 highlighted every time -- is an actuarial
5 note. And the reason why you don't see an
6 actuarial note is because this was exact --
7 exactly the same issue that was addressed in
8 Amendment 174 to House Bill 126.

9 So instead what you see is the
10 commission letter. The commission letter says
11 we've addressed this issue in that actuarial
12 report and simply cross reference to it and
13 say that this bill doesn't have any additional
14 impact beyond that.

15 So there was an actuarial note, in
16 fact, done to this bill, to House Bill 876.
17 It was just done by cross reference to 126.

18 And you're going to sit here and go,
19 how am I supposed to keep track of that?

20 Well, one advantage to this is that this is
21 all on -- I hate to say this, but I actually
22 like it sometimes. This is all on the
23 website.

24 We maintain it on SERS's website, but
25 we maintain it, and you access it through the

1 Public Employee Retirement site, a legislative
2 listing that includes all of the pension
3 legislation, pension-related legislation
4 that's introduced in any given session.

5 In each one of those, you'll see this
6 same concise history and status. If you click
7 on the highlighted commission letter or
8 actuarial note, you'll bring up that
9 commission letter or actuarial note.

10 They're all there. Every single one
11 of them can be found right on the website.
12 And while I don't normally go along with high
13 tech a lot, that's one that seems to work.

14 The one other thing that's on the
15 'net, oh, besides all of our reports, status
16 reports, annual reports, but the other thing
17 that's on the 'net that I would like to call
18 your attention to is on DCED's website.

19 The Department -- Department of
20 Community and Economic Development publishes a
21 municipal pension handbook that's listed in
22 their publications section.

23 We used to do this directly through
24 the commission, and our last version needed an
25 update at the same time that DCED was looking

1 to update theirs. So we wrote theirs, and
2 it's on their website.

3 It's an outline of municipal pension
4 statutes, and it's only an outline. It's --
5 there is no way to provide a brief explanation
6 of the municipal pension status in
7 Pennsylvania because there's no system.

8 We have statutes for police. We have
9 a borough code provision. We have a second
10 class township code provision. We have a
11 first class township code provision. We have
12 Act 600, which applies to boroughs and
13 townships with three or more police officers.
14 We have the third class city code. We have
15 the third class optional charter law. We have
16 the home rule and optional charter law. We
17 have the second city code and second class day
18 city code and the first class city code, and
19 with regard to Pittsburgh and Philadelphia,
20 because of their special statutes, you have to
21 actually access their own individual local
22 ordinances which take on the effect of state
23 law. That's just the police.

24 For fire, we have cities, third class
25 cities. We have third class city optional

1 plans. We have the second and second class
2 day cities. We have the first class cities.

3 And for nonuniform we have anything
4 you want. There's no statutory structure for
5 nonuniform employees. It's whatever the local
6 government creates.

7 There is no statutory structure for
8 fire departments in boroughs or townships.
9 And, yes, we do have paid fire departments in
10 boroughs and townships. But there's no
11 structure as to what that benefit has to be.

12 So while you do have some statutory
13 scheme for certain plans, you have absolutely
14 none at all for others, and it's entirely a
15 matter of local control. And the only way to
16 find out what's there is to go to that
17 specific municipality and look at the
18 ordinance.

19 While you're looking at ordinances,
20 you also have to look at collective bargaining
21 agreements because Pennsylvania treats pension
22 benefits under the provisions of Article 3,
23 Section 26 of the Pennsylvania Constitution,
24 which is what you call the contract clause.

25 So if you've agreed to provide a

1 benefit, even if your statute doesn't do it,
2 you still are bound to provide that benefit
3 and so you also have to look at the individual
4 contracts, statewide, in each municipality.

5 (Sound made by sound system) I feel
6 the same way. And there is no true method to
7 the madness.

8 There is -- you know, there are some
9 statutes that apply to everybody. Act 205,
10 the funding requirement, applies to
11 everybody. The Pension Forfeiture Act, Public
12 Employee Pension Forfeiture Act, applies to
13 everybody.

14 But the vast majority of our statutes
15 don't apply to everybody. They vary depending
16 upon the nature -- the class of the
17 municipality, what the specific municipality
18 has elected to do within the statute governing
19 that class, and also, of course, with boroughs
20 and townships, how big a police department you
21 have.

22 So to sit here and say I'm going to
23 provide you with a one-hour summary of the
24 pension system in Pennsylvania would be a
25 fabrication on my part.

1 First of all, because there really is
2 no system. It's way too individual for that.
3 There's a funding mechanism which is
4 consistent, but that's about it.

5 And beyond that it's a matter of
6 wading one at a time through each individual
7 plan. And this is one reason why your
8 actuarial reports can be so different.

9 We have been working on one -- I'll
10 give you a perfect example. We've been
11 working on widows' benefit forfeiture
12 provisions. What we call the remarriage
13 penalty. I used to refer to it as the
14 living-in-sin clause.

15 A lot of our pension plans, our
16 pension statutes provide that a surviving
17 spouse stops receiving her pension benefit if
18 she remarries.

19 The trouble is, is that was done one
20 municipality at a time. So in order to fix
21 the problem, you have to go into each
22 individual pension statute one at a time and
23 fix it.

24 We've been working on this since the
25 mid '90s and we still have a couple. In fact,

1 our meeting in -- in March is going to address
2 two of them. And we're still trying to get
3 rid of the remarriage penalties.

4 It should be simple. But it's not.
5 And the reason why it's not is because every
6 plan's different and you have to deal with it
7 one plan at a time.

8 And it does result, it has resulted
9 in people being given improper advice in the
10 past. There was a widow, I recall, out in
11 Pittsburgh who mistakenly thought that she
12 could remarry because the General Assembly had
13 repealed the remarriage penalty, but they'd
14 only re --repealed the remarriage penalty in
15 Act 600 and not in the second class.

16 Hey, we repealed it for Act 600. We
17 repealed it for the third class cities. But
18 we hadn't repealed it for the second class
19 cities, and she's a second class city, so she
20 remarried and lost her pension.

21 With advice, you know. So -- from
22 her representative. Actually from her state
23 senator. I wouldn't want -- I wouldn't want
24 to suggest a representative would make that
25 error.

1 But it's easy to make that kind of
2 mistake. And it's easy to make that kind of
3 mistake because of the complexity of the -- of
4 what's out there. And I don't have any easy
5 solutions for any of these things.

6 But you wanted to know what it is we
7 do for a living, we try to keep that stuff
8 sorted out and -- so we give the General
9 Assembly the right advice when we're dealing
10 with legislative proposals.

11 And we also have, and still do, and
12 will continue to do in the future, assist in
13 the drafting of legislation where it's been
14 requested.

15 So we're entirely out there saying,
16 no, that's a terrible idea. Sometimes we're
17 in there saying, this is a great idea whose
18 time has come. Let's do it.

19 I know. It's awful. Now, that I've
20 scared you all to death, any questions?

21 CHAIRMAN LEVDANSKY: Thank you,
22 Mr. McAneny. Before I ask members if there
23 are questions, we've been joined by a few
24 members that came in late. Representative
25 Josh Shapiro from Montgomery County;

1 Representative Jaret Gibbons from Lawrence
2 County; Representative Dan Frankel from
3 Pittsburgh and Allegheny County;
4 Representative Brian Ellis from Butler
5 County.

6 With that, do the members have any
7 questions?

8 Representative Frankel.

9 REPRESENTATIVE FRANKEL: Thank you.
10 And good afternoon.

11 You -- I mean you've just gone
12 through this report and I have had a chance to
13 see this in the past. I mean there's so many
14 issues that we need to deal with and I think
15 you identified some of them, particularly the
16 extraordinary fragmentation that we have in
17 Pennsylvania with respect to the number of
18 local government pension plans.

19 I mean I look at this, 3200 almost,
20 and I've been told that that represents 25
21 percent of all the local government pension
22 plans in the entire country.

23 DIRECTOR McANENY: Well, that's about
24 correct. Actually it's probably a little bit
25 more than 25 percent.

1 REPRESENTATIVE FRANKEL: Okay.

2 DIRECTOR McANENY: It's somewhere
3 between 25 percent and a third and every year
4 we add about 30 more. It's called --

5 REPRESENTATIVE FRANKEL: It's great
6 to be number one.

7 DIRECTOR McANENY: Yeah, it is.

8 REPRESENTATIVE FRANKEL: But somehow
9 not that.

10 And the other thing in terms of, you
11 know, looking at the administrative costs, I
12 mean it's just incredible. I mean the number
13 of plans where you have fewer than ten
14 members, active members, participants, I mean
15 just extraordinary.

16 You have a graph here that shows some
17 of these plans have administrative costs of,
18 what 14, \$1500 per -- per participant.

19 I mean if you're --

20 DIRECTOR McANENY: Well --

21 REPRESENTATIVE FRANKEL: If you're
22 operating -- I mean at the state level, what
23 are the costs, the administrative costs per --
24 per active participant?

25 DIRECTOR McANENY: A couple hundred.

1 REPRESENTATIVE FRANKEL: A couple
2 hundred.

3 DIRECTOR McANENY: I don't have the
4 current number on it.

5 UNIDENTIFIED McANENY ASSISTANT: 197.

6 DIRECTOR McANENY: 197.

7 REPRESENTATIVE FRANKEL: 197. On
8 some of these plans.

9 DIRECTOR McANENY: For the past year,
10 yes. That's not the fault of the
11 administrators of those plans. That's the
12 nature of the beast.

13 The smaller the fund that you're
14 working with -- if I have a three-person
15 pension plan, I'm going to incur certain
16 costs. And there's only three people to
17 divide that among.

18 And if I have a hundred people, I'm
19 going to have pretty much the same
20 administrative costs. I just have a lot more
21 people to split it up with.

22 REPRESENTATIVE FRANKEL: Right. You
23 don't need to --

24 DIRECTOR McANENY: So, you know,
25 it's -- it is just the nature of the beast.

1 The more fragmented it is, the smaller it is,
2 automatically the higher the costs.

3 REPRESENTATIVE FRANKEL: That
4 certainly points to a need --

5 DIRECTOR McANENY: Yeah.

6 REPRESENTATIVE FRANKEL: -- for some
7 consolidation ultimately. I mean I think if
8 the public and taxpayers understood this, as I
9 think, you know, sometimes listening to this
10 information, even our eyes glaze over. But it
11 is really quite extraordinary

12 The other -- the other -- one of the
13 other issues I wanted to touch on, which has
14 perplexed me, because under -- the state aid
15 under Act 205, one of the problems that we
16 see -- and I know in the city of Pittsburgh,
17 which I represent, is in Act 47, two oversight
18 boards.

19 One of our principal problems is our
20 unfunded pension liability. We have received
21 benefits under state aid through Act 205 over
22 the years, which has gone down dramatically
23 over a period of time.

24 And one of the problems we have is we
25 try and restructure our city, and I think this

1 has been -- and it's reflected also in other
2 cities, that the -- or in 47, on the verge of
3 47, is, you know, as we restructure our city
4 governments and expenditures, we downsize
5 significantly. You know, we try and
6 streamline our operations, and you reduce the
7 number of employees, and under the state aid
8 formula you get a whammy, which is less state
9 aid because the formula depends on the number
10 of active employees.

11 So it's kind of a whipsaw effect.
12 While you solve one problem, you exacerbate
13 another problem and, again, this -- I mean
14 this is part of the law and I think something
15 that we -- that we need to take a look at.

16 But as municipalities try and
17 exercise control over their own expenditures,
18 and they have this lingering problem, which I
19 don't think can be resolved internally at this
20 point, of -- of dramatically unfunded pension
21 liability systems, being penalized under the
22 state aid formula for making fiscally
23 responsible decisions in terms of reducing
24 staffing, is -- is problematic.

25 Maybe you can comment on that.

1 DIRECTOR McANENY: Pittsburgh.

2 REPRESENTATIVE FRANKEL: I don't
3 think it's just a Pittsburgh problem.

4 DIRECTOR McANENY: Well, actually
5 Pittsburgh's biggest problem is it has the
6 only 20-plus year no call bond in the
7 country.

8 You can find some places that do a
9 five-year no call on a government bond.
10 Probably 50 percent of them. When you get to
11 about ten years, you might find, oh, 20
12 percent that are still doing it.

13 When you get to 20, you'll find one.
14 And the fact that they issued that bond at a
15 fairly high interest rate and now are stuck
16 with it is a bigger problem for Pittsburgh
17 than the reduction in the size of its
18 workforce.

19 But every time you reduce the size of
20 your workforce, you also reduce your pension
21 costs. I mean they're not having future
22 pension obligations on behalf of employees
23 that they're not hiring.

24 So whenever I say, well, I'm being
25 penalized for reducing the size of my

1 department, you are, in fact, receiving less
2 state aid because your -- but your costs are
3 also coming down.

4 So I might disagree with you about
5 whether or not that's a penalty for that
6 purpose. Or being punished for that purpose.

7 Does it have that impact? Yes. Any
8 time you reduce the size of your workforce,
9 you also reduce the amount of state aid
10 because you have fewer units that are now
11 being calculated in.

12 But the cause of the fiscal distress
13 in Pittsburgh goes way beyond just that.

14 REPRESENTATIVE FRANKEL: Oh, no. I'm
15 just looking at one segment. I understand
16 that.

17 DIRECTOR McANENY: I know. That's
18 like whoa (sound).

19 REPRESENTATIVE FRANKEL: I certainly
20 understand that it's much more complicated.

21 DIRECTOR McANENY: Yeah.

22 REPRESENTATIVE FRANKEL: But this is
23 an issue that I think confronts other cities
24 as well, because that -- that big chunk of
25 money out there, when you look at the city's

1 issues, and you've identified one of them, I
2 mean the city's debt and the city's unfunded
3 pension liabilities, you know, the cost of
4 health care, et cetera, I mean it's many and
5 very difficult to wrestle with for lots of
6 cities across Pennsylvania.

7 And this -- the formula is something
8 that I think maybe we ought to at least look
9 into in terms of a way to adjust so as these
10 cities try to downsize appropriately they're
11 -- they can still address the pension
12 liability.

13 DIRECTOR McANENY: I'm not
14 disagreeing that there could be some changes
15 to the allocation formula that might benefit
16 cities.

17 That's a political determination,
18 however, and not one that our commission would
19 be involved in.

20 I do know that there will be some
21 substantial opposition --

22 REPRESENTATIVE FRANKEL: Sure.

23 DIRECTOR McANENY: -- from the
24 municipalities that will now get less. Yeah.
25 And they've frequently -- I think the term

1 that is always bandied about is bail out. And
2 you want the munic -- you want the townships
3 and boroughs to bail out the cities.

4 I don't necessarily have a
5 fundamental problem with having state aid used
6 to bail out, if you want to use that term, to
7 pay where the need is.

8 Okay. In fact, I think it's a good
9 idea to have state aid go to where the need
10 is. As opposed to our current system where
11 some municipalities don't pay anything at
12 all. Some employees pay nothing at all.

13 REPRESENTATIVE FRANKEL: Well, let me
14 ask. This is the last -- last question and
15 comment.

16 I mean isn't it true under Act 205
17 that some municipalities that really do not
18 have truly distressed pension liability were
19 able to access state aid under Act 205 by
20 eliminating employee contributions or
21 increasing benefits?

22 DIRECTOR McANENY: There have --
23 there have been situations where they not so
24 much access state aid, because if you don't
25 get state aid in the first place, you're

1 pretty much stuck. But they've been able to
2 increase.

3 The mechanism, which admittedly I
4 used to be involved in, the mechanism was --
5 was where you already get state aid, can I now
6 maximize how much state aid I'm going to
7 receive?

8 Surprisingly enough, if I've reached
9 the point in my funding status where I no
10 longer get state aid, it's extremely difficult
11 for that to get started up again.

12 So it's not as easy to manipulate.
13 And, yeah, it can be done and it has been
14 done. I'm sure it's been done.

15 REPRESENTATIVE FRANKEL: Thank you.

16 Thank you, Mr. Chairman.

17 CHAIRMAN LEVDANSKY: Representative
18 Ellis.

19 REPRESENTATIVE ELLIS: Thank you,
20 Mr. Chairman.

21 If I could just follow up real
22 quickly. In the status report on local
23 government pensions, I noticed many of the
24 municipalities are showing several, some of
25 them up to five, six different pension plans.

1 hundred. I mean nobody just sits at a hundred
2 and stays there. There's got to be
3 fluctuation some -- from year to year.

4 So those plans are actually doing
5 pretty well. Then you have your Butler city
6 redevelopment authority plan, which is a
7 one-member plan, and I believe that's all you
8 have, is the four. I don't know that you have
9 a five.

10 REPRESENTATIVE ELLIS: No. I was --
11 I was just using that number.

12 DIRECTOR McANENY: No. I was just
13 saying I think four is the correct number for
14 the city, and that's why.

15 REPRESENTATIVE ELLIS: Are there
16 other cities that consolidate those into -- to
17 one pension or retirement fund --

18 DIRECTOR McANENY: No.

19 REPRESENTATIVE ELLIS: Or is -- are
20 they mandated to be separate?

21 DIRECTOR McANENY: The only one --
22 each one has a separate governing plan for
23 police officers, for firefighters, and for
24 nonuniform, generally speaking.

25 Some of them have multiples.

1 Philadelphia has what they call the 67 plan,
2 which is the old plan. 67 references the year
3 of its adoption. And the 87 plan, which is
4 their more current one. But there are still
5 some people working under the old plan.
6 And -- so they report two different plan
7 structures.

8 They have the same thing with their
9 fire department. They have two plans there.
10 And then they have their nonuniform plan.

11 Now, they consolidate all of them
12 into a single fund for purposes of investment
13 and administration. But the benefit
14 structures are all different. So they're
15 really different funds. They're really
16 different plans.

17 Yeah, most municipalities, and most
18 cities have consolidated for administration
19 and investment into one big plan.

20 But they're still different plans
21 because the benefit structures are different.
22 If you're in a third class city, there's a
23 third class city code structure that you have
24 to follow for your police department. There's
25 a structure you have to follow for your fire

1 department. Those are statutory.

2 There is no structure you have to
3 follow for your nonuniform plan, so you do
4 what you want.

5 And, you know, so they are all going
6 to be different in their structure. Two of
7 them because of the statute and one of them
8 because you want it to be.

9 So you can't really put them all into
10 one plan because they're all different.
11 They're not like a state employees retirement
12 system where everybody is on the same plan
13 with the exception of class of service
14 multipliers.

15 This is a whole lot more than just
16 class of service multipliers. There is --
17 there is across the board in terms of terms
18 so...

19 REPRESENTATIVE ELLIS: Have you seen
20 a movement throughout the Commonwealth of the
21 creation -- you said there are a lot of
22 creation of new plans. Are we seeing a trend
23 toward the defined contribution versus a
24 defined benefit plan?

25 DIRECTOR McANENY: No. No, there has

1 not been such a trend.

2 There are in the -- in the one- and
3 two-person plans, the general rule is they're
4 usually a DC plan, a defined contribution
5 plan.

6 Once you start getting into larger
7 groups, no, they're defined benefits. Say
8 from three on up, they're very rarely a
9 defined contribution plan.

10 REPRESENTATIVE ELLIS: Thank you very
11 much, Mr. Chairman.

12 CHAIRMAN LEVDANSKY: Representative
13 Denlinger.

14 REPRESENTATIVE DENLINGER: Thank you,
15 Mr. Chairman.

16 Thank you for your testimony. If I
17 missed it in your earlier remarks,
18 Mr. McAneny, I apologize.

19 But I'm wondering what are the
20 provisions for third-party auditing that would
21 oversee these plans? Does that happen at
22 the -- at the local level or does that happen
23 in your agency?

24 DIRECTOR McANENY: No. The Auditor
25 General's Office does the audits of all

1 municipal pension plans.

2 They do so under both the specific
3 provisions of Act 205, which direct that they
4 have the audit authority, and under the Fiscal
5 Code, Section 402, which gives the Auditor
6 General the authority to audit any recipient
7 of state aid monies.

8 So those are -- that's how the audits
9 are conducted.

10 REPRESENTATIVE DENLINGER: And -- and
11 in relation to that, I'm wondering --
12 Representative Frankel got into the whole
13 issue on funding liability.

14 Obviously, within the accounting
15 provision under GAAP, corporations in the
16 private sector have been pushed to do a much
17 better job of reporting their liabilities and,
18 in fact, taking steps toward funding them.

19 At the governmental level, the
20 provisions of GASB Statement 45 are pushing
21 municipalities in the same direction.

22 And I'm wondering, are you starting
23 to see any effect of that or hearing of steps
24 by municipalities to start to comply with
25 governmental standards of a more national

1 nature?

2 DIRECTOR McANENY: All right. There
3 are two types of GASB standards that we want
4 to talk about.

5 One is the standard for the reporting
6 of pension liabilities, and I think that has
7 been, across the board, accepted by
8 municipalities and they're all following it.
9 I haven't seen any indication that they're
10 not.

11 The other one is the more current
12 issue of OPEB's, the other post-employment
13 benefits. Probably the most common that
14 everybody thinks about is post-retirement
15 medical benefits.

16 And that is -- well, that's been a
17 declaration of war as far as I can tell. We
18 have entire states that have specifically
19 asserted their intention not -- to not comply
20 with GASB, that they feel that GASB has
21 overstepped its authority in issuing those
22 things.

23 Some places are trying to comply.
24 Other places are absolutely refusing to do
25 so.

1 And I don't have an answer for that.
2 Here in Pennsylvania, it's early and we
3 haven't seen any of the OPEB reportings yet.
4 We'll find out what the intentions are when
5 they start being filed, and that will start
6 landing this year.

7 So at this point in time I haven't
8 heard flat out that they are or aren't going
9 to comply.

10 I mean it's not like I've heard,
11 well, the Governor's Office of Administration
12 has said, forget it, we don't have to do it,
13 we're not going to do it. Or like the city of
14 Philadelphia has said such a thing. In fact,
15 I read that Philadelphia is preparing to
16 release it's OPEB liabilities.

17 So it's part of -- and that's one of
18 the noises they were making as part of
19 their -- I'm not sure if you heard. They're
20 talking about another pension bond, refinance
21 their prior liabilities and help pay off all
22 this stuff at one time.

23 But, you know, how that is going to
24 fall from one place to another, you know, a
25 lot of places don't have post-retirement

1 medicals. That tends to be more of a big
2 employers/small employers issue.

3 So we'll see where it comes. It's
4 too early for me to tell you what Pennsylvania
5 is going to do.

6 REPRESENTATIVE DENLINGER: Very
7 good. I appreciate that answer.

8 And, Mr. Chairman, if I could
9 recommend that over the next year and beyond,
10 this committee may want to watch that
11 situation very closely to see what our
12 municipalities are doing with regard to this,
13 properly accounting for it, and hopefully
14 funding those outstanding liabilities.

15 CHAIRMAN LEVDANSKY: Thank you.

16 Any other members with questions?

17 Representative Seip.

18 REPRESENTATIVE SEIP: Thank you,
19 Mr. Chairman. I have a very specific question
20 I think maybe you may be able to help me out
21 with.

22 I have a third class city in my
23 district. Their police officers were doing
24 some details, some extra work, I guess, for
25 the school district, providing security.

1 And they had -- the school district
2 had to stop using them because it was reported
3 that that was affecting their -- their pension
4 liabilities and increasing the pension of the
5 officers.

6 Is that -- does that sound accurate?
7 Does that -- did I hear that right?

8 DIRECTOR McANENY: All right.

9 REPRESENTATIVE SEIP: Because it was
10 unfortunate, because I think the level of
11 security they were getting from the trained
12 police were probably -- it was better than the
13 nontrained security people that they had to go
14 with then.

15 DIRECTOR McANENY: Yeah. And I'm not
16 necessarily going to disagree with you. In
17 fact, I agree with you a hundred percent on
18 the issue of the level of security.

19 On the issue of including that
20 compensation in the pension, I'm going to tell
21 you that the third class city code
22 specifically provides that overtime pay is not
23 to be included in the calculation for
24 pensions, in the income calculation for
25 pensions.

1 That's what the statute says. But
2 this is Pennsylvania, and the local practice
3 may very well be otherwise.

4 And if that is the case, then you run
5 into your constitutional contract clause
6 problem, and the Supreme Court has shown a
7 lack of interest in what the statute says if,
8 in fact, they've been -- both sides dealing
9 with the issue in a specific fashion and
10 including that money in the pension, then it's
11 included, and there's ways to get out of it
12 but they're all projected into the future.

13 REPRESENTATIVE SEIP: The third class
14 city code, am I right, did I hear that that
15 goes back to like 1921 or something like
16 that?

17 DIRECTOR McANENY: Well, its first
18 version does. But the provision that
19 specifically deals with not including overtime
20 pay in the calculation of the pension goes
21 back to, oh, early to mid '80s. And I don't
22 have the reference right in front of me.

23 But that's about the time frame.
24 Because it followed up -- there was a
25 statutory follow-up on a court case that said

1 that overtime is not to be included under Act
2 600.

3 And since the third class city code
4 statute didn't address it, instead of waiting
5 for a court case, they addressed it. The
6 General Assembly specifically put that in the
7 code.

8 Yeah, so it's been there for a
9 while. Twenty-some years, but that doesn't
10 mean anybody is actually obeying it.

11 REPRESENTATIVE SEIP: Okay. Thank
12 you.

13 Thank you, Mr. Chairman.

14 CHAIRMAN LEVDANSKY: Thank you.

15 Mr. McAneny, I do have a couple
16 questions. In terms of your legislative
17 procedures, you note that you get -- you do
18 actuarial notes in cases where leadership of
19 the House and Senate request such notes to be
20 performed.

21 DIRECTOR McANENY: That's correct.

22 CHAIRMAN LEVDANSKY: You also note, I
23 think, the Appropriations Committee chair --

24 DIRECTOR McANENY: Yes.

25 CHAIRMAN LEVDANSKY: -- can request?

1 Did you also point out that the
2 committee chair in either chamber shall notify
3 the commission upon reporting the bill and --
4 and request an actuarial note?

5 From my perspective, I would, as a
6 member of this committee, before I would vote
7 on any pension-related bill, I would find it
8 very helpful and instructive to have an
9 actuarial note prior to the bill being voted
10 in committee.

11 Does or would the commission be
12 willing to -- to do an actuarial note in the
13 case of the Finance Committee, if you have the
14 chair of the Finance Committee request such a
15 note to be done?

16 DIRECTOR McANENY: Yes, sir. That is
17 not a problem.

18 CHAIRMAN LEVDANSKY: Okay.

19 DIRECTOR McANENY: And I don't -- I
20 want to take a look at the document again. We
21 do it at the request of the chair of any
22 committee.

23 CHAIRMAN LEVDANSKY: Okay.

24 DIRECTOR McANENY: Okay? And what we
25 request is that the committee look at the

1 specific legislation and decide if this is
2 something where there's a real interest in
3 moving before they request a note though,
4 because, if we do a note on every piece of
5 pension legislation, to give you an example,
6 how many COLA proposals do we have right now?
7 Nine? Or is it more than that? Last time I
8 looked it was nine, but I'm not counting.

9 And if we do an actuarial note on
10 each one of those -- unless, of course, you
11 wish to substantially increase our budget.

12 CHAIRMAN LEVDANSKY: Well, I'm not
13 suggesting that, and I think you're probably
14 also cognizant of the fact that none of the
15 bills have moved from this committee.

16 DIRECTOR McANENY: I know that.

17 CHAIRMAN LEVDANSKY: But if -- you
18 know, I'm just asking that, because, you know,
19 rather than having it done --

20 DIRECTOR McANENY: Sure.

21 CHAIRMAN LEVDANSKY: -- after it
22 comes out of committee, before second
23 consideration, you know, my preference would
24 be that if -- if we do decide, you know, to
25 consider a bill, I'd -- I'd like to have the

1 benefit of the actuarial note before we vote
2 on it.

3 DIRECTOR McANENY: We can do it. And
4 we have done it in the past, and we will
5 continue to do it. And if you request the
6 actuarial note, we will proceed with preparing
7 the same.

8 CHAIRMAN LEVDANSKY: Okay.

9 DIRECTOR McANENY: All we really need
10 is a bill. What you -- what you -- what we do
11 have difficulty with are the people that
12 contact us to have us do a -- an actuarial
13 note on a piece of legislation which does not
14 presently exist.

15 And without a bill, or even an
16 amendment number, that's pretty hard to do,
17 because you have to have something to give the
18 actuary for them to take a look at just what
19 we think it might say when it finally comes
20 out, that's a little tough.

21 CHAIRMAN LEVDANSKY: I understand.

22 Just -- just one other question.
23 From your perspective, and in your opinion,
24 what's the most important issue facing our
25 Pennsylvania public employee pension systems?

1 DIRECTOR McANENY: State or local?

2 Because they're totally different.

3 CHAIRMAN LEVDANSKY: Both.

4 DIRECTOR McANENY: You can't match --
5 if you're going to say both, then the only
6 issue that can be both is the funding.

7 CHAIRMAN LEVDANSKY: Either.

8 DIRECTOR McANENY: If you're going to
9 say separately, at the local level, providing
10 some consistency at the local level is
11 probably the most important thing.

12 I don't mean to be insulting. I
13 refer to it as taking away their shovels on
14 the ground that if you're in a hole and you
15 want to stop, the first thing you do is you
16 stop digging and we -- there's an indication
17 that certain municipalities are incapable of
18 that particular function.

19 So possibly to establish some -- we
20 have state laws. I mean we have lots of state
21 laws. And we don't have a pension police, and
22 I don't want to be one.

23 But that's the problem, is we have a
24 lot of state laws, but they're not necessarily
25 followed. And there's really not anything

1 that anybody here at the state level is doing
2 about that or can do about it.

3 Nobody has that authority. And even
4 if you had the authority, who the heck has the
5 capacity to go out and police, you know, 3,000
6 municipalities.

7 So, you know, there's got to be some
8 way to put a real system together and, you
9 know, we have had our proposals in the past.
10 And I'm not here to pitch any of them today.
11 I don't want to come in here as an advocate on
12 behalf of a solution.

13 But to find some way to provide a
14 level of -- a certain degree of consistency,
15 consistency in funding and consistency in the
16 management of the plan, the administration of
17 the plan.

18 CHAIRMAN LEVDANSKY: And how about
19 for our state systems, our state retirement?

20 DIRECTOR McANENY: The state systems,
21 there's -- really the only issue that exists
22 at the state level, the one that drives me the
23 craziest and it probably goes together with
24 the issue on those COLA's but it's a funding
25 issue.

1 We don't fund for COLA's. Now,
2 everybody expects one. Pick up today's
3 Harrisburg Patriot. There's a letter to the
4 editor. I've been retired for eight years and
5 I've only had two COLA's.

6 And -- and I realize there's no
7 promise to anyone that there will be a
8 post-retirement adjustment. But people have
9 come to expect it, and they certainly lobby
10 for it, and their organizations lobby for it.

11 And they'll say things like, well,
12 the money is there. It's in the pension
13 fund.

14 No, it's not. There isn't a penny in
15 those pension plans for COLA's. The money
16 that's in the pension plans has been
17 contributed based upon the cost of the
18 existing plan. It's to fund the existing
19 benefit.

20 We don't fund for a cost-of-living
21 increase. If we're going to keep doing
22 cost-of-living increases every X number of
23 years, or whatever, then we should advance
24 fund.

25 We should plan for it right now. If

1 you decide to pass a cost-of-living increase,
2 not one penny of the money that's in either
3 one of the state systems gets used for that.

4 What does get used for it is new
5 money. Well, who does the new money come
6 from? The taxpayers. The employers. And you
7 have to amortize it then over a period of
8 years.

9 If you do a COLA, you got to put more
10 money in. The state is going to contribute
11 more to SERS. The state and the schools are
12 going to contribute more to PSERS.

13 It doesn't increase the employee
14 contribution. They are fixed. So if you're
15 going to have COLA's, prefund.

16 CHAIRMAN LEVDANSKY: And in that
17 regard, could -- my understanding is that
18 we're one of the few states that permits the
19 state and public school employees to withdraw
20 their contribution at retirement.

21 If we want to do COLA's, would it, in
22 your judgment, be appropriate to consider
23 requiring retirees to leave some of their
24 contribution in the system to help fund those
25 future COLA's?

1 DIRECTOR McANENY: Our mechanism for
2 withdrawal of contributions at the time of
3 retirement is very employee friendly.

4 They do not -- the amount that they
5 get back is more than what they lose in the
6 reduction, the actuarial reduction. Okay?
7 It's a real bargain. That's why you see
8 everybody do it.

9 Do I think that if you're going to
10 have COLA's, tell somebody that if they
11 withdraw their contributions, you don't get a
12 COLA? That's an administrative issue that
13 would have to be addressed by the systems.

14 I'm not sure that's possible to do it
15 on a one-on-one basis that way.

16 CHAIRMAN LEVDANSKY: I'm not --

17 DIRECTOR McANENY: But I think it's
18 fair to say across the board no more
19 withdrawals of contributions at the time of
20 retirement and we're going -- if that money
21 was then earmarked for the funding of future
22 COLA's, then it would fund COLA's.

23 But if you don't use it to fund --
24 but if the statute doesn't specifically
25 require that that happen, then it's still

1 going to be the same situation, which is that
2 money is simply going to go into the pot, it
3 will reduce the employer contribution now, and
4 when the COLA's pass you still have this big
5 bump.

6 Always remember that the big hit, the
7 big 2012 jump that everybody is fearful of is
8 a direct result of the General Assembly's
9 refusal to go from one to five percent,
10 because that was too big a jump, and so we
11 stayed at one and zeros, and that way -- you
12 know, they pushed it off into the future.

13 You can kick the can down the road
14 some more but eventually you get to a dead
15 end.

16 And, yeah, if you're going to fund a
17 COLA, there are ways you could utilize that
18 money to do that. There are also additional
19 contributions that could be made to fund
20 something like that.

21 But from an actuarial perspective, if
22 it's going to be done, and it's been done and
23 there's a history of it being done, we may as
24 well recognize that it's going to continue to
25 be done, quit pretending that it's -- well,

1 it's ad hoc and we don't know if we're really
2 going to do it.

3 Yeah, we are. At some point. I
4 don't know when. But some day we will. It
5 may not be until 2015. But at some point
6 there's going to be another one.

7 If you're going to do that, fund for
8 it. It's not really a complicated issue.
9 It's sort of like if you're going to -- you
10 have two ways of doing it. You can either
11 take out the mortgage and buy it or you can
12 save the money in advance and pay for it.

13 I'm suggesting we save the money in
14 advance instead of just taking out the
15 mortgage and paying it off. So...

16 CHAIRMAN LEVDANSKY: Thank you.

17 Representative Sainato.

18 REPRESENTATIVE SAINATO: I just want
19 to follow up on Chairman Levdansky's line.

20 I've heard a rumor -- or this goes
21 back to -- years, when it came to COLA's, and
22 you're saying that you cannot use the money in
23 the system to pay for a COLA, is that a law?
24 Is that a federal law? Is it -- that question
25 comes up all the time.

1 DIRECTOR McANENY: Okay.

2 REPRESENTATIVE SAINATO: Is the money
3 in the system? Was the federal government
4 saying you cannot do that?

5 DIRECTOR McANENY: The federal
6 government has nothing to do with it.

7 REPRESENTATIVE SAINATO: Okay.

8 DIRECTOR McANENY: The money that's
9 shown, when you look at an actuarial valuation
10 report for SERS or for PSERS, the dollars that
11 you're looking at are projected based upon no
12 change in the existing plan.

13 They don't anticipate, there's no
14 assumption that says there's going to be this
15 benefit boost in the future. A COLA.

16 Therefore, whenever there's a COLA,
17 your funding all of a sudden drops. If I pay
18 out -- if I've got a fund of a half million
19 dollars and I pay out a hundred thousand
20 dollars, I now only have \$400,000 but I still
21 have \$500,000 worth of debt.

22 What do I do? I had an obligation to
23 pay five. I had the five. Everything was
24 wonderful. Now, I'm fully -- now I'm a
25 hundred less. What do I do with that? I have

1 to throw more money in in order to catch up.

2 Now, that's what I mean. It's not a
3 case of -- that we have this vast surplus,
4 because there is no vast surplus and an
5 actuary will tell you that there never is a
6 vast surplus.

7 The old story of the actuaries, where
8 they're playing golf and the one hits to the
9 left side of the green and the other hits to
10 the right side of the green, and they shook
11 each other's hand because together they got a
12 hole in one.

13 Okay? Because they don't hit
14 directly on. They're coming up with
15 estimates, and they're projecting it over, in
16 the case of a governmental plan, forever.

17 They're looking at 40 years, 60-year
18 futures, and saying this is how much you have
19 to put in today, assuming all of these things
20 being equal, in order to keep this level out
21 into the future forever.

22 There's huge variations in reality
23 from year to year. It's the long-term view
24 that comes out correctly. Not the short
25 term.

1 So if in the 1990s, because there's
2 been a big kick in the stock markets, all of a
3 sudden I've got this big, quote/unquote,
4 surplus in my plan, that's not a surplus.
5 That's the actuarial gain that's there today
6 to pay off the future actuarial loss when
7 there's an adjustment in the market and
8 everything keeps coming out again.

9 They're projecting into the future.
10 They assume there's going to be good years and
11 bad years. If -- when there's a good year --
12 you're allowed to smack me if I go too fast --
13 when there's a good year, you don't take that
14 money out. When there's a -- any more than
15 when there's a bad year you have to reach into
16 your pocket and put the whole thing in right
17 now.

18 You're going to have years when the
19 earnings exceed what you expected and you'll
20 have a surplus on paper, and you're going to
21 have other years where you don't earn that
22 much and you'll have a loss on paper and the
23 loss and the gain outbalance -- balance each
24 other out and it's working just fine over a
25 long-term projection.

1 But there's an immediacy issue that
2 arises. You'll see a situation where you have
3 a couple of good years and the plan looks like
4 it's got this big surplus in it so everybody
5 does an Act 9. You know?

6 And then immediately thereafter you
7 have the market correction that everybody --
8 whether it was going to be that intense or
9 not, you have 9/11 in there that nobody
10 anticipated, but, sure, there's a market
11 correction and things come back down again.

12 That's not unanticipated by the
13 actuary when he was determining what money
14 should be going into the plan.

15 You can't take contribution holidays,
16 which, thank God, we now appear to have
17 legislatively -- legislatively corrected. You
18 can't have times with saying, well, we don't
19 have to put any money in this year.

20 Well, if you don't put the money in
21 this year, you're going to have put twice as
22 much in next year. And if you pay money out
23 in a COLA that you were saving to pay future
24 benefits, then you're going to have to fund
25 those future benefits by additional

1 contributions.

2 That's what I mean when I say the
3 money to pay for the COLA isn't in there right
4 now.

5 There's cash in there. If you have
6 \$500,000 in the bank and you want to go out
7 and buy, you know, a yacht and you drop a
8 hundred thousand dollars on it, that doesn't
9 mean that you couldn't do it.

10 But if you really need to have that
11 \$500,000 in there because of future
12 liabilities, you're going to have to pour a
13 lot more money into that bank account again to
14 rebuild the fund.

15 It's not going to do it on its own.

16 REPRESENTATIVE SAINATO: Okay. Just
17 one quick.

18 So the COLA's, every COLA we've done
19 in the past, we've done an appropriation for
20 it. Is that correct?

21 DIRECTOR McANENY: Every COLA that
22 has been done in the past has been paid for
23 from general fund monies, either at the state
24 or at the school district level, yes.

25 REPRESENTATIVE SAINATO: Okay. Thank

1 you, Mr. Chairman.

2 Thank you.

3 CHAIRMAN LEVDANSKY: Representative
4 Boyd?

5 REPRESENTATIVE BOYD: I was good to
6 go until that last comment and I want to
7 clarify. I want to make sure I understand
8 what you're saying.

9 When a cost-of-living adjustment for
10 a current retiree is passed, the benefit
11 enhancement, those dollar amounts that are not
12 within the actuarial analysis needs to be
13 additional revenue kicked in?

14 DIRECTOR McANENY: That's correct.

15 REPRESENTATIVE BOYD: And that
16 revenue is kicked in by?

17 DIRECTOR McANENY: Taxpayers.

18 REPRESENTATIVE BOYD: Okay. In the
19 year they're passed or -- in the year that
20 they're passed or spread out over a period of
21 time?

22 DIRECTOR McANENY: Generally spread
23 over a period of time. We amortize it like
24 you were paying off a mortgage.

25 REPRESENTATIVE BOYD: But they

1 continue to accrue?

2 DIRECTOR McANENY: Oh, yeah. You pay
3 it off with interest. So that's -- you know,
4 if you had the money to pay for it today,
5 which actuarially you never do, but you pay it
6 off over a period of time and you pay it off
7 with interest.

8 So, yeah, we --

9 REPRESENTATIVE BOYD: Okay.

10 DIRECTOR McANENY: It's more than
11 just the straight dollar-for-dollar
12 correction. It's -- you have an interest
13 adjustment in there as well.

14 REPRESENTATIVE BOYD: When a COLA is
15 approved, passed, do those -- is there a
16 direct analysis of what those specific costs
17 are attached to that piece of legislation,
18 like a fiscal note for a standard piece of
19 legislation, is there an actuarial note?

20 DIRECTOR McANENY: There's an
21 actuarial note done, yes, and it does advise
22 of the cost.

23 REPRESENTATIVE BOYD: And that
24 actuarial note will assume what year -- how
25 many year amortization?

1 DIRECTOR McANENY: Usually ten.
2 Sometimes twenty. Depending upon the
3 legislation. You have had -- we have had
4 actuarial -- we have had -- we have had COLA
5 statutes which have provided for the
6 amortization time period. So we have to use
7 whatever legislation calls for.

8 REPRESENTATIVE BOYD: I guess the
9 question I'm trying to get at is you really
10 don't know what the cost is because you don't
11 know how long those employees are going to
12 live.

13 DIRECTOR McANENY: Okay.

14 REPRESENTATIVE BOYD: So how do you
15 know what the cost of that specific COLA is to
16 be amortized through 20 years? How can you
17 fix that in a ten-year period of time --

18 DIRECTOR McANENY: Okay.

19 REPRESENTATIVE BOYD: -- when
20 everybody's benefit is higher?

21 DIRECTOR McANENY: You have an
22 actuarial analysis which calculates the
23 projected life expectancies of the
24 individuals.

25 One of the things the actuaries look

1 at is the demographics of the population
2 involved, including their age and their life
3 expectancies.

4 So, yeah, the cost, when you're
5 determining how much you're going to have to
6 pay off, is not year to year, this is how much
7 we had to pay out in a check this year for
8 COLA's. That isn't how you pay it off.

9 You pay it off on the basis of this
10 is how much as a lump we need to pay off the
11 entire future cost of this cost-of-living
12 increase and this is the time frame in which
13 you have to pay it off, and you pay it off in
14 equal installments each year.

15 REPRESENTATIVE BOYD: But shouldn't
16 at the very least those -- those time periods
17 be the same?

18 DIRECTOR McANENY: No. Should the
19 time period be the same as the life expectancy
20 of the individual most likely to live the
21 longest? No, it shouldn't be that long.

22 It should be, as it is right now, it
23 should be averaged out to it's -- a workable
24 time frame.

25 You can't utilize the life expectancy

1 of those persons able to receive the COLA
2 because you're going to have people in there,
3 you know, with 20, 25, 30 more years of their
4 life expectancy. It's not actuarially sound
5 to utilize a time period that long --

6 REPRESENTATIVE BOYD: But if I
7 understand --

8 DIRECTOR McANENY: -- in a
9 projection.

10 REPRESENTATIVE BOYD: But if I
11 understand the actuarial analysis correctly,
12 they will project some people who receive that
13 COLA every five years, some will receive it
14 every 35 years.

15 Based on those analyses they'll come
16 up with an average of what that time period is
17 and that number should, at the very least,
18 have some correlation to how long that dollar
19 figure is amortized over.

20 DIRECTOR McANENY: Okay. Let's --
21 let's separate the two issues, which is the
22 way it's done actuarially.

23 You have an analysis done of a
24 projected life expectancy and projected costs
25 associated with that.

1 But everything gets brought down to
2 present value. You don't use the future
3 cost. You use the present value of the future
4 cost.

5 Because there's going to be interest
6 earned, interest paid. Those things in
7 between, all through.

8 You then have an actuarial pay-off
9 period. You don't allow that debt to sit out
10 there based upon the life expectancy -- the
11 life expectancy of that population.

12 The life expectancy of the population
13 already got included in the calculation for
14 purposes of what is the dollar cost. It's in
15 there once. Okay?

16 If you extend it any longer than
17 that, first of all, you're going to end up
18 paying a lot more interest over a longer
19 period, because the longer the time frame the
20 more interest you're paying.

21 But we have a statutory structure
22 that says we're not going to allow those newly
23 created liabilities to just go on forever that
24 way.

25 And you're talking about a total

1 revamping of the state retirement systems and
2 how they amortize benefit changes. That's
3 more than just an actuarial analysis.

4 That's -- that's going right to the heart of
5 the system itself.

6 You could end up paying a lot more
7 but, more importantly, you're going to end up
8 with new liabilities being created because
9 you're going to have another COLA and you
10 still haven't paid off the COLA before it and
11 you're just going to keep stacking COLA on
12 COLA on COLA on COLA, and it's going to be --
13 yeah, you're just going to keep digging the
14 hole deeper. Then somebody is going to have
15 to come and take your shovel away.

16 REPRESENTATIVE BOYD: And, yeah,
17 my -- my concern is we should, if anything,
18 prefund. If we're going to pass a COLA, we
19 should prefund it.

20 DIRECTOR McANENY: I'm a hundred
21 percent behind that.

22 REPRESENTATIVE BOYD: Okay.

23 DIRECTOR McENENY: The commission
24 issued a report on that back in -- I believe
25 it was 1992 saying that very thing.

1 REPRESENTATIVE BOYD: Thank you.

2 CHAIRMAN LEVDANSKY: Thank you.

3 Chairman Nickol.

4 REPRESENTATIVE NICKOL: Thank you. I
5 guess the problem prefunding COLA's is usually
6 you face a dilemma. A COLA is on the agenda
7 and to prefund the future COLA you're like
8 doubling the cost up-front as you move into a
9 prefunding situation.

10 DIRECTOR McANENY: Correct.

11 REPRESENTATIVE NICKOL: I --
12 Representative Sainato had asked a question
13 and he wasn't here in the '90s, but I think
14 the '90s gave people a perception that COLA's
15 were free.

16 Because during those years isn't it
17 the case that, with the pension funds earning
18 double digit returns and the actuarial value
19 of assets climbing, we had a falling
20 contribution rate and so the rate might fall
21 four percent one year and you could deliver a
22 two percent COLA or a COLA that was equivalent
23 to two percent of the rate, so the rate
24 continued to come down even as you were
25 granting COLA's during that period creating

1 the impression that you had free COLA's?

2 DIRECTOR McANENY: That's absolutely
3 correct and it's a direct result of the fact
4 that contributions -- mandatory contributions
5 to the state and school employee retirement
6 systems are not tied to normal costs.

7 Normal cost is what it's going to
8 cost every year to just maintain the existing
9 plan for the existing employees. And if
10 you're not making normal costs, you're drawing
11 money out of the savings.

12 And we took holidays. We just said
13 we don't have to contribute anything, and not
14 only was the COLA free, the whole pension
15 system was free. I mean it was wonderful.

16 So now we're paying for it. No pun
17 intended.

18 REPRESENTATIVE NICKOL: Kick the can
19 down the road and here we are.

20 DIRECTOR McENENY: Yeah. We ran into
21 the wall.

22 REPRESENTATIVE NICKOL: I appreciate
23 your comments in response to Representative
24 Levdansky's thought about getting some kind of
25 an actuarial review before bills are run in

1 committee.

2 Because of the change in House rules,
3 with us amending the second consideration, if
4 we don't get some kind of a review in advance,
5 it puts us in a difficult position should
6 there be any amendments.

7 And I know many of your actuarial
8 notes contain help or technical amendments
9 that essentially clean up the bills. And so
10 if we get those in advance, it's something we
11 can do in committee and it makes things a
12 little bit more tidy than not having to deal
13 with those issues when we get to the floor.

14 DIRECTOR McANENY: Well, thank you
15 very much. Normally people just refer to them
16 as technical amendments. That's the first
17 time I've heard them referred to as helpful.

18 We do appreciate that. We do try.

19 REPRESENTATIVE NICKOL: It's a new
20 one.

21 You had -- you had mentioned about
22 you don't want to have the pension police.
23 And my understanding is that Act 205 which
24 started -- which required municipalities to
25 contribute a minimum amount each year --

1 DIRECTOR McANENY: Yes.

2 REPRESENTATIVE NICKOL: -- toward
3 their pension obligations. What happens if a
4 municipality doesn't make that contribution
5 required by Act 205? If you're not the police
6 officer, who is?

7 DIRECTOR McANENY: Well, we actually
8 are in that case. We make them do it.

9 And we have taken them to
10 Commonwealth Court for writs of mandamus in
11 order to compel that very thing. So in that
12 regard we are.

13 What we're not the pension police on
14 is what is the structure of your plan, what
15 are the benefits provided, and how do you
16 administer it.

17 And that's way beyond the capacity of
18 any state agency that I'm aware of to be able
19 to handle. There's just no method to the
20 madness.

21 REPRESENTATIVE NICKOL: I was
22 surprised when you had said that you have the
23 same number of plans -- I believe this was
24 what you had said -- when Act 205 passed we
25 had the same number of plans today that are

1 underfunded that we did back in 1985, which
2 was a surprise to me because if municipalities
3 have been making that required contribution,
4 shouldn't they have caught up and be fully
5 funded today?

6 DIRECTOR McANENY: Yes. But, again,
7 that also assumes that the plan stay the way
8 it was as far as its benefit structure and its
9 administration. And the reality has been that
10 it has not.

11 REPRESENTATIVE NICKOL: So you're
12 saying they were using their shovels in the
13 interim?

14 DIRECTOR McANENY: Oh, yes, sir.
15 Power equipment.

16 REPRESENTATIVE NICKOL: I wanted to
17 follow up on a response you had to
18 Representative Frankel's question. I'm
19 curious about the 20-year no call bond.

20 Was that a pension obligation bond so
21 it's actually a liability to the city of
22 Pittsburgh as opposed to the pension fund
23 itself?

24 DIRECTOR McANENY: It's a liability
25 of the city of Pittsburgh. They used it to

1 fund pensions, but they pledged the full faith
2 and credit of the city rather than the future
3 receipt of state aid.

4 Act 205 does make reference to a type
5 of pension bond where they pledge state aid
6 against it. That is not what this was. This
7 was done by the city itself.

8 It was really kind of famous when
9 they did it. It was the first Internet
10 auction of government bonds. They were going
11 to save all this money on the administrative
12 side. And I assume they did.

13 But it's created a real monster
14 because they've got a high interest rate and
15 they -- they're stuck with it. They have to
16 pay it year after year after year. They can't
17 call the thing.

18 REPRESENTATIVE NICKOL: Okay. But it
19 would be a liability of the city itself?

20 DIRECTOR McANENY: The city.

21 REPRESENTATIVE NICKOL: Not the
22 pension fund?

23 DIRECTOR McANENY: It's of the city.
24 But we allow them to utilize the dollar value
25 in calculating their pension liabilities for

1 state aid purposes. It's not truly a
2 liability of a pension anymore, but it's still
3 utilized as if it were for purposes of state
4 aid.

5 REPRESENTATIVE NICKOL: And just one
6 final comment. I actually did read your
7 divestment report.

8 DIRECTOR McENENY: Oh, my God.

9 REPRESENTATIVE NICKOL: I read it.

10 DIRECTOR McANENY: I hope you slept
11 well.

12 CHAIRMAN LEVDANSKY: Mr. McAneny,
13 thank you so much for your -- your information
14 and appearing before the committee and your
15 insights and help in answering our questions
16 as well.

17 DIRECTOR McANENY: Any time.

18 CHAIRMAN LEVDANSKY: Thank you.

19 Thank you.

20 Next -- we're running a little bit
21 late -- Mr. James Allen, the Secretary of the
22 Pennsylvania Municipal Retirement System.

23 SECRETARY ALLEN: Thank you,
24 Mr. Chairman, and good afternoon.

25 On behalf of the Pennsylvania

1 Municipal Retirement System, or PMRS, as we
2 are more commonly referred to, I'd like to
3 share our story with the Finance Committee of
4 the House of Representatives.

5 As secretary, a title designated in
6 our creating legislation, Act 15 of 1974, I
7 have had the privilege since September of 1984
8 to lead our agency and to share our story with
9 many interested and widely diversified
10 individuals and groups.

11 I look upon this occasion as one of
12 the most critical presentations I will ever
13 make for I believe you, as members of the
14 General Assembly, are at a crossroad as to how
15 public policy affecting the retirement of tens
16 of thousands of Pennsylvania's public servants
17 will be crafted for the next several
18 generations.

19 I commend you for facing this task
20 with the willingness to seek a better
21 understanding of the current actors in the
22 arena.

23 Now to our story. Yes, we are a
24 state agency. Yes, there are three statewide
25 pension plans, not two. And, yes, it is

1 highly likely that you have never heard of
2 us. You are not alone.

3 Some quick facts about us:

4 One: We are an independent state
5 agency. Read: Not under the Governor's
6 jurisdiction.

7 I am appointed by an 11-member board
8 that has fiduciary responsibility for the
9 Pennsylvania Municipal Retirement Fund.

10 Two: The board is composed of the
11 State Treasurer, who is also the custodian of
12 the system's fund, the Secretary of the
13 Commonwealth, and nine other individuals who
14 are in most cases to be specifically nominated
15 to the Governor who has the prerogative to
16 appoint them to two four-year terms.

17 The designated nominating
18 organizations are:

19 The County Commissioners Association;

20 The Pennsylvania League of Cities;

21 The Pennsylvania Association of
22 Township Commissioners;

23 The Pennsylvania State Association of
24 Township Supervisors;

25 The Pennsylvania State Association of

1 Boroughs;

2 And the Pennsylvania Municipal
3 Authorities Association.

4 Two individuals who are active
5 members of the system are to be nominated, one
6 each, by associations representing municipal
7 firemen and municipal police. The final
8 appointee is to be a retiree, a retired member
9 of the system.

10 Municipalities may optionally enroll
11 their pension plan or plans in PMRS by
12 adopting an ordinance and executing a contract
13 and having at least 75 percent of the existing
14 members of that plan to be enrolled approve of
15 the transfer to the PMRS.

16 As of today, we have over 865
17 individual pension plans ranging in size from
18 the city of Allentown's municipal employee
19 pension plan with over 550-plus active and
20 vested members and another 175 retirees and
21 with assets of over a hundred million to
22 approximately a dozen plans with no active
23 members, just one or two retirees, and a
24 hundred thousand or so in assets.

25 I stray from my testimony just to

1 make a brief point. There was an issue of
2 defined benefit, defined contributions. Of
3 our 865 plans, right now 683 are DB plans and
4 another 180 plus are DC plans.

5 Back to the remarks. Combined our
6 board has fiduciary responsibility for
7 approximately 14,000 current or former public
8 employees and approximately 1.5 billion in
9 assets.

10 Some of the more interesting facts
11 about our agency are:

12 Each plan defines its own benefit
13 structure. We have some municipalities
14 that -- with benefits that are better than
15 those offered by SERS, and we have other plans
16 that can only be defined as bare bones plans.

17 Each plan's actuarial experience,
18 their individual cost, is determined
19 independently of any other plan within the
20 system. We have plans that have a normal cost
21 as high as 40.2 percent of payroll and some
22 that have a normal cost of less than three
23 percent of payroll.

24 Just as interesting is that we have
25 plans that are as much as 1,200 percent funded

1 and others that are -- and one that is only 13
2 percent funded.

3 The system pools for certain types of
4 costs or experiences: Retiree life
5 expectancy, disability funding, administrative
6 costs, and investment performance.

7 We administer to these plans with a
8 staff complement of less than 30 employees at
9 the current time and with no state funding.
10 All of our revenue for operating our agency
11 comes from the fees we charge our plans and a
12 portion of the investment income we make off
13 of the portfolio.

14 As to this last part -- point, our
15 source of revenue, I need to interject that
16 authorization to use a portion of our
17 investment income to operate the system is
18 derived from a section of law -- our law that
19 has historically been capped or grandfathered
20 on a five-year basis.

21 Our authorization to use that source
22 of revenue has expired, and we are in need of
23 having it renewed. Senate Bill 1039,
24 currently in the Senate Finance Committee,
25 would retroactively approve the system's use

1 of this revenue source for 2006 and 2007 and
2 would also legitimize the funding source
3 through to 2010.

4 This is a rather embarrassing problem
5 that has repeated itself every five or so
6 years going back even before my tenure as
7 secretary.

8 It is this one issue where we as an
9 agency interact with the General Assembly.
10 This interaction is something of which I am
11 not proud.

12 Everyone likes to talk about the
13 money, so let me share some of the information
14 about our portfolio. At year's end, December
15 31st, 2007 we had approximately 1.56 billion
16 under management.

17 While certainly pale in comparison to
18 PSERS or SERS, we are still ranked the 638th
19 largest pension plan in the United States by
20 the trade publication Pension and
21 Investments.

22 I list our asset allocations. I
23 don't need to read those numbers to you.

24 Because of legislative and structural
25 designs, we must take an extremely

1 conservative approach to our portfolio.

2 We assume an actuarial investment
3 return of six percent net of expenses and we
4 must book a six percent return to all of our
5 plans every year regardless of what we make or
6 don't make.

7 We have no investments in hedge
8 funds, private equity, or venture capital.
9 About as exotic as we get is our 42 million in
10 forest acreage.

11 We employ 12 different money managers
12 and one investment consultant. As to
13 performance, our conservative approach has
14 hurt it when times are good, as you might
15 imagine, and it has helped us when times are
16 not so good.

17 I share our information as compared
18 to the SERS portfolio based on our two
19 published comprehensive annual financial
20 reports or CAFRs for the last ten years.

21 I would interject here that PMRS's
22 return for last year, 2007, is 8.2 percent. I
23 do not know what SERS is.

24 While the returns may not be as much
25 as we would have liked, we are nevertheless

1 proud of them. We believe that through full
2 market cycles we have proven that we can
3 maintain a performance that ranks in the top
4 third of our class of peers.

5 I believe I may have imposed on your
6 generous invitation, but I would be remiss if
7 I did not share one additional very important
8 fact about our agency. We are extremely
9 frugal and very proud of it.

10 While it is the design of the system
11 that we have to be conservative, whether it --
12 whether -- yeah -- where -- whether it is the
13 design of the system that we have to be
14 conservative or whether it's the make-up of
15 the board where over half of the board members
16 will still get their benefits from the system,
17 thus making the task of watching this money as
18 if it was their own or whether it is the
19 entrepreneurial nature of our agency, our
20 plans do not have to join us. They can do it
21 themselves or contract with a private
22 provider. Whatever the reasons, we do watch
23 our pennies.

24 I leave with you another set of
25 numbers that are attached to this testimony.

1 They, too, are drawn from PSERS, SERS, and
2 PMRS CAFRs. While they probably do not get as
3 much attention as the investment portfolio
4 numbers, they are very important to our board,
5 our staff, and our membership.

6 I close by thanking you once again
7 for your patience and for your invitation. I
8 welcome your questions.

9 And I would just call the attention
10 to the sheet. What I have done is lifted off
11 of the CAFRs the expenses, be they
12 administrative, investment, or commissions and
13 the numbers of memberships covered, and you'll
14 see the average cost.

15 And I'll be happy to take your
16 questions.

17 CHAIRMAN LEVDANSKY: Do any members
18 have any questions?

19 Representative Boyd.

20 REPRESENTATIVE BOYD: With the vast
21 number of different plans under one oversight,
22 if you will, are those plans -- I'll use the
23 term, it's probably not the best term, but the
24 best one I can come up with -- portable?
25 Meaning when somebody is in one municipal plan

1 and they want to leave that position and go to
2 work for another municipality, can they just
3 shift it?

4 SECRETARY ALLEN: If a member of our
5 plans leaves and goes to one that's enrolled
6 within PMRS within one year, their benefit is
7 portable. It's up to the individual to elect
8 that. They may go to a benefit plan that is
9 lesser, but it does have the option -- option
10 to have portable. We probably process
11 somewhere between 60 and 75 a year portable
12 benefits.

13 REPRESENTATIVE BOYD: So I'm clear on
14 how that would operate, if I work for
15 Municipality A and the pension program with
16 them was a defined benefit plan and provided
17 for, let's say, 75 percent of my annual pay
18 when I retired, given whatever, you know,
19 details I would throw into that, you know, how
20 many years of service and so on and so forth,
21 and I wanted to go to work for another
22 municipality and that pension plan only
23 provided for 50 percent, what are my options?

24 SECRETARY ALLEN: Well, the first is
25 you have an option to exercise that

1 portability or not. If you elected to
2 exercise that portability, what we do is
3 calculate the present value of your accrued
4 benefit with Municipality A, transfer it to
5 Municipality B, and guarantee you have a
6 minimum, minimum benefit equal to that present
7 value.

8 That present value may grow, because
9 you have a longer time period there. Maybe
10 you only -- had a promise in Municipality A of
11 75 percent of pay but you only worked five out
12 of the required 25 years, whereas you're going
13 to work 20 years under Municipality B to get
14 that.

15 So we transfer the present value of
16 the accrued benefit and guarantee that at
17 least -- you would at least get that, but you
18 may be, if you will, wearing away that
19 additional benefit until you get up to maybe
20 12 or 13 years in that example.

21 REPRESENTATIVE BOYD: Okay. Thank
22 you.

23 CHAIRMAN LEVDANSKY: Representative
24 Vulakovich.

25 REPRESENTATIVE VULAKOVICH: So

1 basically what you do is you represent all
2 those that -- like, in other words in the
3 cities and towns, the boroughs, the townships,
4 a lot of them have their own pension plans.
5 But if they choose not to, they're with you?
6 Is that pretty much it?

7 SECRETARY ALLEN: They have their own
8 pension plan. They've chosen us to be their
9 administrator of that pension plan.

10 They have the option to self-insure,
11 run it by themselves; they have the option to
12 engage an insurance company or a third-party
13 provider, the private industry, to manage that
14 pension plan; or they have the option of
15 coming to us as the state to take that.

16 We do everything from A to Z, invest
17 the money, calculate the benefits, pay the
18 benefits, and do the actuarial evaluations,
19 that is correct.

20 We're an alternative to the private
21 sector.

22 REPRESENTATIVE VULAKOVICH: Okay.
23 So, in other words, instead of my township,
24 for example, hiring it's own money manager,
25 they would go through you and you would handle

1 everything else?

2 SECRETARY ALLEN: That is correct.
3 It's not just -- they can't select a service
4 from us. It's an all or nothing.

5 If they want us to administer their
6 program, we do the money management. We do
7 the actuarial work. We do the benefit
8 calculations.

9 So they're turning over the fiduciary
10 responsibility to administer that plan to us.
11 They still retain the rights to design the
12 plan, the benefit structure. We tell them how
13 much to pay for it and we administer it from
14 there.

15 REPRESENTATIVE VULAKOVICH: The local
16 board, the township commissioners, how does
17 your fiduciary responsibility play into this?
18 It doesn't?

19 SECRETARY ALLEN: Oh, they still
20 retain the fiduciary responsibility, but they
21 share it with us. We assume a large portion
22 of that fiduciary responsibility.

23 But as the trustees of the original
24 creator of the plan, the contract that gives
25 them the benefit, they still have that

1 liability and they're still the ultimate last
2 guarantee.

3 REPRESENTATIVE VULAKOVICH: So are
4 you still governed by Act 205?

5 SECRETARY ALLEN: Our plans are very
6 much governed by Act 205, yes.

7 REPRESENTATIVE VULAKOVICH: So you --

8 SECRETARY ALLEN: In fact, I'm
9 filling out 800 --

10 REPRESENTATIVE VULAKOVICH: You get
11 your MMO's. So, for example, the local
12 wouldn't get -- the local township wouldn't
13 get the MMO? In other words you would?

14 SECRETARY ALLEN: No. The -- the --
15 we act -- again, it's -- if you will -- we are
16 a third-party administrator. Act 205 applies
17 to that municipal plan.

18 REPRESENTATIVE VULAKOVICH: All
19 right.

20 SECRETARY ALLEN: They have to do
21 their MMO. We do the actuarial work, tell
22 them what their MMO is going to be, then they
23 share that with us, what their payroll is, and
24 we bill them.

25 They have to fund it and we make sure

1 they are in compliance with Act 205. They
2 still have the responsibility, though, to fund
3 the MMO we created.

4 REPRESENTATIVE VULAKOVICH: Now, as
5 far as employee contribution, if their fund is
6 overfunded, not actuarially sound, a lot of
7 times --

8 SECRETARY ALLEN: There's a big
9 difference.

10 REPRESENTATIVE VULAKOVICH: -- you're
11 actuarially sound, and they say, oh, boy, you
12 know, the pension fund is funded. One -- but
13 if the employees do not contribute and have to
14 contribute, because of some -- in the contract
15 where it says, if you reach a certain point,
16 you must contribute to the pension fund.

17 For example, my police pension back
18 home was five percent. There was times for a
19 few years they contributed nothing, and then
20 because of some added benefit or downfall in
21 the investments, they might have had to
22 contribute 1.3 percent or something like
23 that.

24 How does that play in with you? You
25 make sure they --

1 SECRETARY ALLEN: Well --

2 REPRESENTATIVE VULAKOVICH: What?

3 SECRETARY ALLEN: Well, yes. The
4 answer is the same provisions that apply under
5 Act 600, under Act 205, all those other acts
6 that Jim McAneny was just explaining, apply to
7 our member plans.

8 What happens though in our situation,
9 your municipality would have joined us and if
10 they were a typical, if there is such a thing,
11 Act 600 plan, that contract would have said
12 that their police officers have to contribute
13 five percent of their pay, but they may waive
14 them on an annual basis or for a three-year
15 time period or whatever the collective
16 bargaining.

17 So they contractually waive that
18 every -- for a limited time and then they have
19 to re-enact that waiver or if they -- again,
20 this can't happen under an Act 600 plan, but
21 if they said that, you know, there's no member
22 contributions, we have plans that have no
23 member contributions.

24 REPRESENTATIVE VULAKOVICH: Well, one
25 of the problems is that Act 600 has never been

1 redone. Nobody wants to touch it.

2 And the contracts have basically --
3 they got legal advice on whether you can do
4 this under Act 600 or not. That's why some
5 places have overtime included in their -- in
6 their calculation for their pension. Others
7 don't.

8 There's been case law. There's like
9 three cases on that, too. Act 600 is just,
10 you know --

11 SECRETARY ALLEN: I agree. I think
12 what Jim, if the take-away, if I could, from
13 Jim McAneny is that you have state law, you
14 have constitutional law, and then you have
15 collective bargaining, and the three do not
16 always go in sync.

17 REPRESENTATIVE VULAKOVICH: With Act
18 600 being on silence.

19 Okay. All right. Thank you.

20 CHAIRMAN LEVDANSKY: Any other
21 questions from members?

22 Just -- just two quick from me,
23 Mr. Allen. I think there's been some
24 discussion in the Senate about making future
25 municipal employees become part of the state

1 retirement system.

2 SECRETARY ALLEN: A state retirement
3 system. Not the state retirement system.

4 CHAIRMAN LEVDANSKY: Okay. Yeah.
5 Could you elaborate on that and, you know, how
6 would that work and is this a good idea in
7 your judgment?

8 SECRETARY ALLEN: First, let me give
9 you the official position and understanding.

10 The Pennsylvania Municipal Retirement
11 Board, who I work for, has taken a very clear
12 stance and said if there is to be a statewide
13 system we are the logical entity to be that
14 statewide system.

15 Secondly, they said as to whether
16 there should be a statewide system or not,
17 that's not for PMRS to decide. That's for the
18 boroughs, the townships, the General Assembly
19 to debate.

20 I get paid from 865 pension plans to
21 administer those pension plans. I don't get
22 paid to lobby for being a bigger agency or not
23 being a bigger agency.

24 What the board has been very
25 consistent about over all the years that this

1 has been proposed, is that if it is an agency,
2 the logical repository would be PMRS because
3 we do that now. It's only a matter of
4 scalability.

5 As to the merits of such a
6 legislation, I would say that I have to step
7 out of my role as executive -- or the
8 secretary of the agency and give you a
9 personal opinion because I can't do that in an
10 official capacity.

11 I believe that the General Assembly
12 has dramatically failed in understanding the
13 issue of public pensions.

14 You opened the door very widely in
15 asking Jim McAneny, what is the major issue
16 facing public pension plans?

17 I'm going to come back to that with
18 saying that the major issue failing -- the
19 major failing of the state right now is that
20 we don't have a public policy on retirement.

21 How can you tell me what is a good
22 pension and what is a bad pension? Is it one
23 that gives you 75 percent of pay with or
24 without Social Security? Is it one that
25 allows you to retire at 60 versus 65?

1 We do not have in this Commonwealth,
2 nor does this country unfortunately, have a
3 public policy statement on what is a good
4 retirement system.

5 So how do you benchmark them when you
6 don't have a benchmark? It gets
7 straightforward in looking at it that way.

8 Secondly, if you want to assume
9 responsibility, because I do know my
10 constitutional law to the -- very limited, I'm
11 not an attorney, but municipalities aren't
12 creatures of the state.

13 If you want to say as creatures of
14 the state you want to assume responsibility
15 for their pension plans then, yes, it makes
16 sense to say that there should be a statewide
17 system.

18 If you want to recognize those
19 3,000-plus entities as separate employers with
20 separate rights for collective bargaining,
21 separate rights for setting their wages,
22 separate rights for vacation and leave policy,
23 why would you preempt them and take away their
24 additional pension right benefits?

25 Why do you -- why would you want to

1 say that this Commonwealth is going to set the
2 pension plan benefits for every private
3 employer in this Commonwealth?

4 Do you have the constitution -- I
5 mean the institutional wisdom to say what's
6 good for XYZ municipality as an employer?

7 CHAIRMAN LEVDANSKY: One other area.
8 Given the --the enormous numbers of municipal
9 retirement plans, do you think that
10 consolidation of these local public pension
11 systems -- is it -- is that a viable idea and
12 is that something that the legislature ought
13 to undertake?

14 SECRETARY ALLEN: Clearly it goes
15 without saying that there is going to be a
16 certain critical mass where the economies of
17 scale kick in. Absolutely. It goes without
18 saying that that's a fact.

19 The reality is, though, how do you
20 bring that about? Do you force it as a
21 mandate? Or I've said from day one the
22 General Assembly has failed -- if that was
23 your goal, to get back to the issue, do we
24 have a public policy on pension plans in this
25 Commonwealth? No.

1 If we did and that policy said
2 consolidate and save costs, why wouldn't you
3 structure Act 205 to set an incentive in terms
4 of reimbursing and reimburse a hundred percent
5 of the cost for those that have a consolidated
6 pension plan benefit structure and only 75
7 percent for those who don't? Why don't you
8 use the carrot-and-stick approach?

9 If you wanted to say a consolidated
10 plan, in its smaller size, why don't you say
11 every plan under five employees must be in a
12 statewide plan or a consolidated plan?

13 Or there are other ways to get to
14 it. To me, you haven't set the benchmark of
15 what you really want so that we could properly
16 answer and divine your -- the way to get
17 there.

18 CHAIRMAN LEVDANSKY: Thank you.

19 Chairman Nickol.

20 REPRESENTATIVE NICKOL: Thank you.

21 I'd like to go back on Representative Boyd's
22 question on portability.

23 I'm curious what you do. You said
24 about transferring the present value of
25 accrued benefits. What -- how do you do that

1 when you have -- you said you had a range of
2 plans, some with as low as 13 percent
3 funding. If they don't have the money in the
4 system, how do you transfer the benefits?

5 SECRETARY ALLEN: Well, there's --
6 there's -- should always be money in the
7 system. Very, very rarely do we run into a
8 negative value.

9 But if a municipality -- if an
10 individual had five years of service, we
11 calculate his benefit as if he was going to
12 take a vested benefit, the accrued value of
13 that benefit, the present value at this
14 present point in time, and we say, okay, his
15 personal contributions may be \$4,000 and the
16 overall benefit value that he's earned is
17 \$15,000, we'll take \$11,000 out of that
18 municipality's pension plan and transfer that
19 \$15,000 into Municipality's B pension plan and
20 say, Jim Allen, in Municipality B you have a
21 benefit worth at least \$15,000.

22 Now, in reality, he may have his five
23 years over in Municipality B, and given the
24 lower benefit structure, that present value
25 there may be only 12,000. That's where the

1 wear-away comes in for the 3,000 until he gets
2 -- works another three or four years and then
3 it kicks up in that way.

4 That's why it's an optional provision
5 for that employee.

6 REPRESENTATIVE NICKOL: If -- if a
7 municipality opts into coverage through PMRS,
8 can we opt out as well?

9 SECRETARY ALLEN: Yes. And that's
10 really one of the major reasons why we have to
11 have such a conservative approach to our
12 investment return.

13 If the municipality joins PMRS, as I
14 said, they have to have a majority vote of the
15 governing body and the 75 percent vote of
16 those plan participants, of those coming in.

17 Once they're in, they're in for five
18 years. The law says they cannot withdraw
19 until five years after that . They may
20 withdraw after five years at any time, again,
21 with majority of vote of counsel or the
22 governing body and 75 percent vote of the plan
23 participants.

24 Our average has been between 15 and
25 25 new plans a year. That's net. We probably

1 lose three plans, for a year or so has been
2 our average.

3 REPRESENTATIVE NICKOL: If I recall
4 Jim's testimony, there's about 3,000 or so
5 municipal pension plans in Pennsylvania and
6 you have, what, 865? About 28 percent of them
7 are members of PMRS?

8 SECRETARY ALLEN: We -- we say we
9 have about 25 percent of Pennsylvania's public
10 pension plans and about -- we cover about 10
11 to 11 percent of the workforce. So that gives
12 you the small nature of us.

13 REPRESENTATIVE NICKOL: When --
14 what -- I was looking at your returns on --
15 your earnings and in seven of the ten years
16 you exceeded your assumption of six percent.

17 What do you do with the additional
18 monies? I mean I assume you don't take that
19 home in a paycheck. I mean how is that
20 apportioned or used for the benefit of the
21 members?

22 SECRETARY ALLEN: Every -- when I
23 said we pool investments, every one of our
24 plans will get a six percent return this
25 year. No matter what the market does, we must

1 credit them six percent.

2 We do have what we call an
3 undistributed earnings to pay for down years
4 and that can be as much as ten percent of our
5 overall assets. The highest it's ever been
6 has been nine percent, and that was starting
7 in 2002. So we were able to weather some of
8 it.

9 We can also have a negative resource,
10 if you will, when the market goes less than
11 that.

12 If we make more, as we did -- and
13 let's go back to 2006. We made 12.6 percent.
14 We credited everybody's account the six
15 percent. That's employer and employee. We
16 put some aside into our reserve. We put about
17 two percent of that into a reserve,
18 undistributed earnings, and then -- and I say
19 it this way. The law says we pay excess
20 interest. We paid a dividend.

21 Each plan for every hundred dollars
22 they got -- the number escapes me -- I think
23 it was a 3.51 percent bonus.

24 And that -- this is where some of you
25 may find this interesting, is each individual

1 municipality decides what to do with that
2 bonus. It must stay in the pension plan under
3 federal law. The municipality can do, as some
4 have argued the General Assembly should have
5 done, and use that as an actuarial surplus to
6 pay for future down years. It's an actuarial
7 gain.

8 They can give it to their active
9 members, in which case we have a separate
10 account for Jim Allen, plus he has excess
11 interest over here, which acts much like a
12 defined contribution piece.

13 We divide that at time of retirement
14 by an annuity factor. So he may get 50
15 percent of pay under his plan but he may have
16 \$5,000 built up in excess interest bonus which
17 will convert to an extra \$50 a month for that
18 individual.

19 Or we may return it in a
20 cost-of-living increase. If there -- if
21 everybody -- a municipality said we're going
22 to do all three, give an equalized yield on
23 our dividend as of January 1st, well, at the
24 end of January, we paid out those retirees,
25 existing retirees 3.12 percent. I'm choking

1 on this cost of living. It has nothing to do
2 with the consumer price index but it has to do
3 with our investment return. So we pay them a
4 dividend.

5 REPRESENTATIVE NICKOL: And that 3.1
6 percent, that's for that year or does that
7 increase their base in --

8 SECRETARY ALLEN: No. That's
9 prefunded. We take that, the
10 three-and-a-half -- the 3.12 percent of excess
11 interest and convert that into an annuity
12 value so it funds his benefit higher for the
13 rest of his life.

14 REPRESENTATIVE NICKOL: Do you have
15 members in your plan who are participants in
16 Social Security and some who are not
17 participants in Social Security who may --

18 SECRETARY ALLEN: Out of the 865, I
19 think all but six or seven are covered by
20 Social Security.

21 REPRESENTATIVE NICKOL: Are all those
22 uniform plans that are not covered?

23 SECRETARY ALLEN: No. I have one, at
24 least one of them is a nonuniform -- two of
25 them are nonuniform plans that are not covered

1 by Social Security.

2 REPRESENTATIVE NICKOL: Okay. Thank
3 you.

4 CHAIRMAN LEVDANSKY: Mr. Allen, thank
5 you so much for your insights and the
6 information you shared with us.

7 SECRETARY ALLEN: Again, thank you
8 for your invitation.

9 CHAIRMAN LEVDANSKY: Just one final
10 thing just for the members who are here.
11 We'll send out an e-mail follow-up to this.
12 But in addition to the hearings, tomorrow and
13 Wednesday in Harrisburg, next week the Finance
14 Committee will be having a hearing on Monday
15 afternoon in Montgomery County on the research
16 and development tax credit and on Tuesday,
17 March 4th, in Philadelphia on House Bill 2196,
18 the youth employment tax credit. But we'll
19 get out an e-mail and hard copies to everybody
20 here on that.

21 Thank you so much for being here
22 today.

23 (The proceedings were concluded at
24 4:00 p.m.)
