RE: HB 2083 Forest and Wildlife Advisory Council

Representative Metcalfe,

We are writing on behalf of the Pennsylvania Chapter of the Association of Consulting Foresters (ACF) in regard to the planned implementation of the Forest and Wildlife Advisory Council. As a diverse group of foresters with varied backgrounds and business practices, we are uniquely situated to give feedback to a landowner's perspective on issues that impact the management of private forestland. Our clients represent the full spectrum of forest ownership in Pennsylvania.

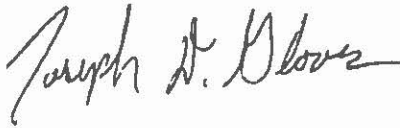

The Pennsylvania Game Commission has many challenges. None of these seem to compare to the management of white-tailed deer. Since the implementation of longer doe seasons and antler restrictions over a decade ago, we as forest managers are starting to see the tangible benefits to forest health and regeneration of our client's forest lands. Where there once was a sea of fern, there is now various species of oak, maple, cherry, hickory, beech, and birch. For decades beforehand, deer populations were allowed to over browse forests and farms alike. We are finally seeing a deer population and density that is in line with what the habitat can support.

Youth and Senior hunters have an excellent and extended opportunity to be in outdoors and enjoy hunting. Now there is a movement about to reduce these opportunities? Who will serve on this Forest and Wildlife Advisory Council? What do they know about the deer management? Where will the Game Commission, which is already under funded, get the funding for another bureaucratic layer? Simply by being non-paid

“advisors” does not mean that it has no cost in time and money to an already over-stretched Game Commission.

The Pennsylvania Chapter ACF, on behalf of our diverse client base, is united on the position that the Game Commission should remain in charge of our Commonwealth’s white-tailed deer.

Sincerely,

A handwritten signature in cursive script that reads "Joseph D. Glover".

Joseph D. Glover, ACF, CF  
Chapter Chair
